## **Contract Research Organization**

The SRC is a full-service CRO for unbiased stereology, including study design, tissue preparation, and data collection by highly trained personnel using state-of-the-art computerized systems.

### **You Send Us Tissue, We Send You Data**

For over two decades the SRC's Contract Services have met the stereology outsourcing needs of bioscientists in academia, government agencies, and private industry.

- **Tissue processing and Histology.** High quality and rapid histology services at discount rates. Our experienced technicians know how to quickly embed, section and stain tissue for efficient stereology analysis.
- **Computerized Stereology Services.** For tissue processed either at our facilities or yours, our stereology experts provide accurate, precise, and efficient data using state-of-the-art computerized stereology.

All Contract Services carried out under strict confidentiality in compliance with quality control/quality assurance standards that meet or exceed federal regulations, including Good Laboratory Practices (GLP; Code of Federal Regulations Title 21, parts 11 and 58).

### **The Five-Step Process**

- Contact us to set up a teleconference to discuss your project.
- Receive a quote with applicable discounts and details of histological, stereological, and other considerations for your project, including an estimated time frame and benchmarks.
- Ship your tissue for processing or processed slides to our labs for analysis.
- Our trained technicians, blind to treatment when possible, collect stereology data using high throughput computerized systems.
- We send a draft report with results for decoding. After our revisions, we send a certified Final Report with detailed methods, results, figures, discussion, and references.

### **Price Check**

We offer the most competitive rates in the industry for rapid and professional stereology outsourcing.
